

We manufacture our Simply Storage cabinets right here in Oklahoma utilizing state of the art computer machining equipment. This ensures precision, quality control and the ability to customize any job to exact specifications. These cabinets are designed for off the floor mounting which allows for easier cleaning of your garage, helps keep rodents out of cabinets and will be protected if water gets in the garage.

- * Guaranteed Customer Satisfaction
- * Outstanding Customer Service
- * Quality Products
- * Insured Professional Installers
- * Manufactured in Oklahoma

All of our cabinets are manufactured from 75lb 3/4" high-density board. They are machined with the latest state of the art computer machining equipment ensuring each cabinet is cut to exact size every time! We use top of the line full extension ball bearing drawer glides to ensure strength and stability.

Cabinets are available in our standard depths of 12", 16", 24" and 30". Standard widths are 1', 2', and 3'. Heights vary depending on design. Custom sizes are also available. Colors available are white, gray, black, maple and cherry melamine finishes. Melamine is a laminate coating that protects the wood against moisture and allows for easy cleaning. Also available in the standard non-melamine finish.

Customer Testimonials

"This experience was one of the easiest and most anticipated projects I've ever been involved in. Garage Innovations was beyond excellent from start to finish. They have my full backing."
- Gary McIntosh of Tulsa

"Top notch operation from consultation to installation. Very clean, professional workers. My garage is a "showroom". Turn key operation from start to finish, they finished the job in just 4 days. WOW!!"
- Wayne Purser of Edmond

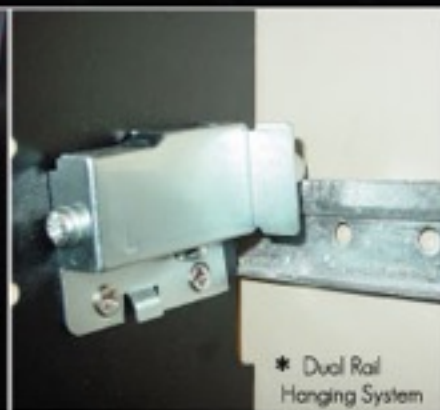

"The professionalism by both sales and service were exceptional and reflects on the end result. Very detailed company that will make sure you are completely satisfied."
- Marry Roper of Tulsa

ORGANIZATION MADE EASY

* Shelf Stiffeners

* Dual Rail Hanging System

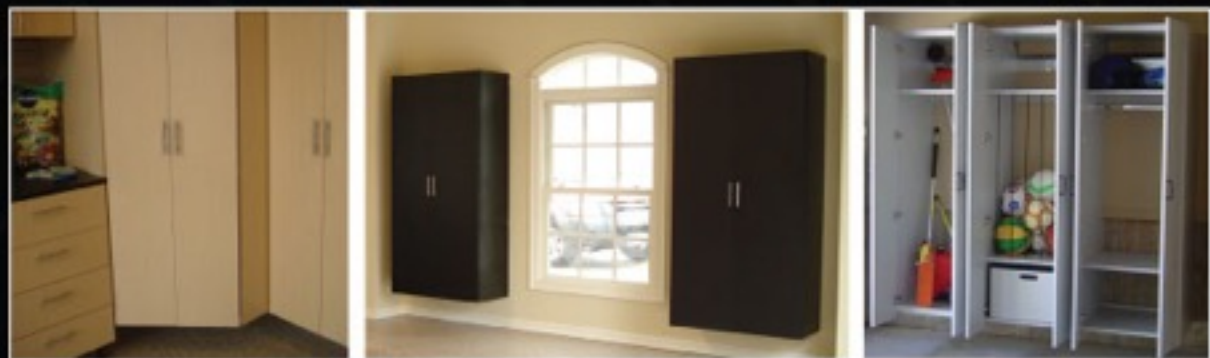

* Hinges

Our **Dual Steel-Rail Support System** is screwed directly into the studs allowing the cabinets to suspend directly from the rail. This system gets the cabinets off the floor making it easier to access the floors underneath each cabinet. The end result is a nice flow of cabinetry in your garage or office.

Our **Euro-Hinges** are manufactured from steel and are fully adjustable to 125° allowing for more accessibility to your cabinets, whereas most cabinet hinges open to only 110°. We mount 2 to 4 hinges on each cabinet door depending on size.

Shelf Stiffeners are steel supports that fit onto the front of each shelf. They are specially designed for our cabinets to provide each shelf with extra strength and to protect from bowing and edge wear and tear. Each shelf has a 100lb weight capacity.
